# 2000 PRODUCTION AWARDS

*Compiled by Gail Patcher*

The records included in this booklet consist of all those lactations of 305 days or less *completed in 2000*. Here are a few rules and regulations.

*All completed records must be sent to the office*, regardless of whether the doe has met the minimum standard. "Completed record" means that the doe is dry, has left the herd, or has died. Stars are automatically awarded, and the records are used in the annual production awards. There is no fee required for does freshening on or after January 1, 2000. There is a fee if an AR certificate is desired. Eligible bucks are automatically awarded +S titles. Eligible bucks being registered are automatically awarded \*S titles. No application or fee is required.

The first time a doe makes a record meeting the minimum standards, she receives her star and is assigned an AR number (DHIR testing only), under which all subsequent records will be listed. If she receives her star from a one day test, she is not assigned an AR number.

## TITLES/AWARDS FOR DOES

An AR/\*D (Advanced Registry/star doe) has met the requirements for milk and/or butterfat while on official DHIR testing (305 days or less). A \*D (star doe) has earned the required points on an official one day test. The \*D title is passed down through the generations, if the progeny have also earned stars. Therefore, the \*D daughter of a \*D is called a 2\*D.

A doe that has not have a star can earn one through her progeny.

- \* She can earn her star if she has three \*D daughters or AR/\*D daughters, in any combination.
- \* She can earn her star if she has two +S or AR/+S sons, or one of each.
- \* She can earn her star if she has one +S or AR/+S son and two AR/\*D or \*D daughters.

## TITLES/AWARDS FOR BUCKS

A buck also earns his +S (plus sire) through his progeny.

- + He can earn his plus if he has at least three daughters *out of three different dams* who have earned stars. If three of these daughters are AR/\*D's, the buck is an AR herd sire, and if he is a master champion, he is an ARMCH+S buck. If his daughters are \*D's only, he is called MCH only.
- + He can earn his plus if he has at least two sons who are either AR sires or +S's, or any combination.
- + He can earn his plus if he has one AR or +S son and two \*D daughters.
- + He can earn a second plus (++) if he has at least three star daughters out of three different dams and two +S sons.

A \*S is an inherited title. A buck is awarded this title at birth (or later) under the following conditions:

- \* his dam is a \*D (one-day test or AR for *both* milk and butterfat) *and* his sire is either a +S or a \*S whose dam's star was earned by a one-day test or AR for both milk and butterfat *or*
- \* his dam is a \*D (one-day test or AR for both milk and butterfat) *and* his sire's dam is a \*D (one-day test of AR for both milk and butterfat).

## HOW TO READ A RECORD

It's easier to explain by using an example.

**2.10-21 1/8-305-1115-79(7.1%)46(4.1%)**

This means that the doe started her lactation at the age of two years and ten months. At some time during this lactation she was officially measured at 21 1/8" (only miniature breeds are measured). In 305 days she milked 1115 lbs. of milk, 79 lbs. of butterfat averaging 7.1% and 46 lbs. of protein averaging 4.1%

Enjoy reading the Top Ten lists, and learn to appreciate the dedication of the breeders who are on test, and the animals who have made these high records.
