## 2003 PRODUCTION AWARDS

*Compiled by Gail Pletcher-DHI Coordinator*

*10 Hilltop Drive  
Stockton, NJ 08559  
(609)773-0060*

[gaymornd@comcast.net](mailto:gaymornd@comcast.net)

The records included in this booklet consist of all those lactations of 305 days or less *completed in 2003* and the records of all does participating in one-day tests during 2003.

This was a banner year for DHIR testing. There were twenty-four herds on test in fourteen different states. There were three each in Michigan, Texas, Virginia, two each in Minnesota, Idaho, Oregon, Missouri, and one each in North Carolina, Maine, New Mexico, Florida, New York, Massachusetts, and our first ever in Alaska!

There were four herds testing standard sized does. The rest were all Nigerians.

There were 144 lactations completed in 2003. Some does completed more than one lactation. There were 84 qualifying records.

The Top Ten this year is dominated by the Rosasharn herd, owned by Anne Petersen, and the Jobi herd, owned by Joanne Jelke, with a few newcomers to the scene. Anne's exceptional doe Uni places first in milk production and butterfat for the second year in a row.

There were thirty-three applications for one-day tests made in 2003, of which thirty-one tests were completed. There were 144 does tested, representing twenty-nine owners. Eighty one does made qualifying records.

Eight bucks qualified in 2003 for their plus sire titles, and the famous ARMCh Goodwood Kauri Tree ++\*S qualified for his second plus. Three does qualified for their stars through their progeny.

There are twenty herds signed up for DHIR testing in 2004, and hopefully more owners will apply later on. We've had several one-day tests already.

It's easy, inexpensive, and lots of fun to milk test your animals. Why not make this year the year you try it for the first time.

### **HOW TO READ MILK RECORDS**

#### **DHIR Records**

**For instance: 2.10-21 1/8-305-1115-79(7.1%)46(4.1%)**

This means that the doe started her lactation at the age of two years and ten months. At some time during this lactation she was officially measured at 21 1/8" (only miniature breeds are measured). In 305 days she milked 1115 lbs. of milk, 79 lbs. of butterfat averaging 7.1% and 46 lbs. of protein averaging 4.1%.

#### **One-Day Test Records**

**For instance: 3.06-21 5/8-22-6.0-5.1-68.49**

This means that the doe was three years and six months old on the day she was tested. She was officially measured at 21 5/8" tall. She gave 6.0 lbs. of milk at 5.1% butterfat, and her total score was 68.49.

*Top Ten booklets for each year from 1988 on  
are available at only \$3.00 each. Contact Gail  
Pletcher to order.*

*Please note that prior to 1993 no record was kept of either DHIR records or one-day test records that did not qualify.*

*Also, the standard doe records used in the All-Time Awards include only those does making records from 1963 on. Unfortunately, all records prior to this year have been lost.*

*There will soon be Top Ten booklets for standard does going back to 1963. Some years will be combined. They will be available for only \$3.00 per booklet. If you'd like to have an Excel file containing all standard does' records, please contact Gail Patcher.*
