AGS

2009 PRODUCTION AWARDS

*Compiled by Gail Pletcher-DHI Coordinator
10 Hilltop Drive
Stockton, NJ 08559
(609)773-0060
gaymornd@comcast.net*

The records included in this booklet consist of all those lactations of 305 days or less *completed in 2009* and the records of all does participating in one-day tests during 2009.

This was another banner year for DHIR testing. There were 38 herds on test in 16 different states. There were 11 herds testing standard sized does. The rest were Nigerians. There were 303 lactations completed in 2009. Some does completed more than one lactation. There were 155 qualifying records, although some does missed qualifying because they hadn't been measured.

There was one owner/sampler herd.

The quality of Nigerians keeps improving. When testing first began it was unusual to see a record of 1,000 lbs. In 2009 there were 2 does over 1,500 lbs and a total of 18 over 1,000 lbs!

There were 28 applications for one-day tests from 10 states made in 2009, and 21 tests were completed. 4 group tests and 17 single herd tests were done. There were 142 records, representing 25 owners. 83 does made qualifying records, including 3 does who participated in an ADGA one day test.

17 Nigerian bucks qualified as of March 1, 2010 for their plus sire titles, and one qualified as a ++S. 4 Nigerian does qualified for stars by progeny. 1 standard buck qualified for his plus star title, and 13 standard bucks going back to 1962 were awarded +S titles posthumously.

There are 31 herds signed up so far for DHIR testing in 2010, including 2 owner sampler herds, with 442 does enrolled, and more herd owners have expressed interest in applying.

It's easy, inexpensive, especially now that AGS offers the Owner-Sampler program, and lots of fun to milk test your animals. Why not make this year the year you try it for the first time?

HOW TO READ MILK RECORDS

DHIR Records

For instance: 2.10-21 1/8-305-1115-79(7.1%)46(4.1%)

This means that the doe started her lactation at the age of two years and ten months. At some time during this lactation she was officially measured at 21 1/8" (only miniature breeds are measured). In 305 days she milked 1115 lbs. of milk, 79 lbs. of butterfat averaging 7.1% and 46 lbs. of protein averaging 4.1%.

One-Day Test Records

For instance: 3.06-21 5/8-22-6.0-5.1-3.6-68.49

This means that the doe was three years and six months old on the day she was tested. She was officially measured at 21 5/8" tall. She gave 6.0 lbs. of milk at 5.1% butterfat and 3.6% protein, and her total score was 68.49.

***Top Ten booklets for each year from 1988 on are available
at only \$5.00 each. Contact the AGS office to order.***

4	Buttin'Heads Hope's Springs Eternal *D	Rucker	2.11	260	530	37	7.0%	1996

No Pygmies participating in one-day tests qualified

Please note that prior to 1993 no record was kept of either DHIR records or one-day test records that did not qualify.

Also, the standard doe records used in the All-Time Awards include only those does making records from 1963 on. Unfortunately, all records prior to this year have been lost.
